

NovaTech — Product Guide

NovaFlow

NovaFlow is a workflow automation platform designed to help operations teams automate repetitive business processes. Users can create workflows containing triggers, approval steps, notifications, and automated actions.

NovaFlow Integrations

NovaFlow currently supports integrations with Slack, Microsoft Teams, Google Workspace, Salesforce, HubSpot, and Zapier. Additional integrations can be requested through the customer support team.

NovaDesk

NovaDesk is a customer support workspace for managing customer conversations and support tickets. Its main features include shared inboxes, ticket routing, internal notes, customer profiles, and support analytics.

NovaDesk User Roles

NovaDesk provides three standard roles. Agents can manage assigned tickets and communicate with customers. Team leads can manage tickets, review team activity, and configure routing rules. Administrators can manage workspace settings, users, integrations, and security controls.

Getting Started

New NovaFlow customers can create their first workflow from the Workflow Templates section. NovaDesk customers should first configure their support inbox and invite their support agents.

Plan Limits

The standard NovaFlow workspace supports up to 50 active workflows and 10,000 workflow executions per month. NovaDesk standard workspaces support up to 25 support agents.
